

Hello,

I real love the Sorenson and Dlink videophone because I can communicate to my doctor or else who are hearing person. One of my hearing person dont have TTY or else. So I can use the VRS. That VRS real help me to communicate to hearing person. If not the VRS will not be there how I can communicate. So, I real hopefully that the FCC will keep up with that. I hopefully that you will understand what I am talking about it. REAL KEEP UP WITH VRS. I did communicate to my son by VRS. My son dont have Soreneson or Dlink Videophone. He is hearing person. That is why I need to have VRS so I can talk with them. I want tell you Thank you so much and Keep up. SMILE.

Thank you,  
Kathleen Waters
